SUMMARY

Final-year B.Tech AI & Data Science student who works across the full data lifecycle – wrangling, EDA, dashboarding, and automation. Built end-to-end Excel/Power Query analyses on real-world job market data and an n8n-based AI automation pipeline. Comfortable turning messy structured and unstructured data into decisions.

EDUCATION

EASA College of Engineering & Technology
B.Tech, Artificial Intelligence & Data Science

Coimbatore, Tamil Nadu
Sep. 2022 – Mar. 2026

PROJECTS

Data Science Job Market Analysis | *Excel, Power Query, Power Pivot, DAX*

[GitHub →](#)

- Built an end-to-end Excel analysis on real 2023 job-posting data answering four salary/skills questions using Power Query ETL and a Power Pivot data model
- Wrote custom DAX measures comparing US vs. non-US median salaries and built combo PivotCharts linking skill demand to pay
- Found SQL and Python to be the highest-value skill combination by demand and salary across the dataset

Data Jobs Salary Dashboard | *Excel, Map Charts, Array Formulas*

[GitHub →](#)

- Built an interactive Excel dashboard to benchmark data-role salaries by title, country, and schedule type using dynamic array formulas (MEDIAN + FILTER)
- Designed dropdown-driven filters with data validation so charts update automatically without macros or Power Query

AI Email Summarizer Workflow | *n8n, Local LLM (Ollama), Google Sheets*

[GitHub →](#)

- Automated Gmail extraction and 2-line AI summarization via a locally hosted LLM, logging structured results to Google Sheets
- Built the workflow entirely in n8n, connecting Gmail OAuth2, a local inference endpoint, and the Sheets API

EXPERIENCE

Software Engineer Intern

Jan. 2026 – Mar. 2026

Carpediem Tech Innovations

Coimbatore

- Built AI-powered data processing and automation workflows in Python to support business decision-making
- Developed REST APIs and backend services to move structured and unstructured data through analytical pipelines
- Collaborated on feature development, testing, and deployment using Git and agile practices

Gen AI Intern

Dec. 2025 – Jan. 2026

Carpediem Tech Innovations

Coimbatore

- Built NLP data pipelines for automated text processing, reducing manual data-handling effort and improving workflow consistency
- Built automation scripts using N8N, chaining multi-step data workflows across APIs, databases, and third-party services
- Worked across the pipeline – preprocessing, feature engineering, output validation, and post-deployment monitoring

AI Software Engineer

Oct. 2025 – Dec. 2025

AdSavvy

Coimbatore

- Integrated ML models into full-stack applications to improve ad performance, audience targeting, and data-driven decision-making

TECHNICAL SKILLS

Languages & Querying: SQL (PostgreSQL), Python, R

Data Analysis & Wrangling: Pandas, NumPy, EDA, Data Cleaning

Visualization & BI: Power BI, Power Query, Power Pivot, DAX, Plotly, Streamlit

Modelling: Scikit-learn, TensorFlow, PyTorch

Databases & Tools: PostgreSQL, Supabase, Git, REST APIs, N8N (automation)

CERTIFICATIONS

Data Analytics Job Simulation

Deloitte Australia (Forage)
